KIEFEL at the European Thermoforming Conference in Antwerp (Belgium)

What are the current trends in thermoforming technology? How can intelligent technical solutions be translated into higher productivity and decisive competitive advantages, and which innovative materials can help in this respect?

These were the key issues discussed at the 7th European Thermoforming Conference, which was held between 22nd and 24th April 2010 in Antwerp, Belgium. Some 200 participants from Europe and North America attended the event, where they discussed various technological aspects and future developments. This year's forum once more provided KIEFEL GmbH of Freilassing (Germany) with an interesting platform for exchanging experiences with customers and business partners alike.

The conference programme included a rich and varied combination of well-researched presentations and highly-charged discussions. The event concluded with a series of expert presentations organised by a leading company in the thermoforming sector.

KIEFEL impressed the professionals present with its contribution on the subject of "The stacking and further processing of thin-walled packaging components".

The conference as a whole, which takes place in Europe every two years, was organised by the European Thermoforming Division, which is in turn part of the worldwide Society of Plastics Engineers.

KIEFEL is a world leader when it comes to the design and manufacture of machines used to process plastic foil materials. The company offers core expertise in the fields of moulding and joining technology. As a supplier to reputable manufacturers in various sectors, Kiefel GmbH services customers in the automotive, medical technology, refrigeration and packaging industries.

The head office of KIEFEL GmbH is in Freilassing/Germany. The company also runs its own network of sales and service centres in the United States, France, the Netherlands, Russia, China and Brazil, and is represented by sales partners in more than 60 countries worldwide.

Kiefel GmbH is a member of the German Brückner Group, a worldwide leading supplier of plastics machinery with some 1,000 employees. Brückner is the world market leader in the field of film stretching lines and also provides equipment for the manufacture of cast film and sheet as well as service & upgrading products.
